- communication with the bank
- languages English, Russian and any other at the discretion of the client

Additional features:

- Ability to integrate with other systems using RestAPI
- Binding to crypto wallets
- Loyalty system
- Mobile application for Android and iOS

There are accounts in the same bank banks (information will be provided after the conclusion of the agreement on intentions.

All documents on the swift have been submitted. If necessary, the swift can be completed within a month.

2. Selection of software for VISA/MS acceptance

We help you choose software for rent or a full purchase for connecting a payment acceptance gate.

The price will be formed individually according to your needs.

When you launch your gate, the price per transaction can be reduced to 0.2%
What a significant savings for you.

We will also help you choose an acquiring bank. Everything is individual, since each bank has all Case by Case. Also, the second plus is that you can assign MCC codes yourself for your projects.
